AXELERA
ARTIFICIAL INTELLIGENCE

*Datacenter Performance. Edge Efficiency.*
*Accelerating Inference, Everywhere.*

# Company Overview

2026

# Introducing Axelera AI

Datacenter performance, edge efficiency. **Accelerating inference, everywhere**.

## Company

Axelera AI is the largest AI semiconductor company in Europe

| 2021 | 20 | $450M | 10+ |
|---|---|---|---|
| Founding | Countries | Total funding | Patents pending |

## AI Processing Unit (AIPU)

The most powerful, efficient and affordable AI Processing Unit for computer vision & GenAI

**METIS**
Computer vision and SLMs at the edge (2024)

**4x** More power efficient

**3x** More cost efficient

**2-8x** Higher performance

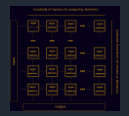

**EUROPA**
Gen AI for high-end edge & HPC (2026)

**TITANIA**
Datacentre (2027/8)

## Technology

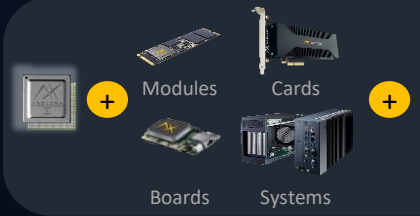

Proprietary D-IMC architecture

Unique architecture of densely interleaved memory & compute for high throughput & efficient AI

## Product

AIPU, edge-native form factors and open software stack

VOYAGER SDK

Seamless deployment; available to test today

## 500+ customers and partners, across 5 continents *(select examples)*

esa · EuroHPC Joint Undertaking · Multiverse Computing · ASTUTE · THALES · dare · Telefónica · SAFRAN · NTT DATA · ADVANTECH · BOSCH · DELL · SECO

## Investors

Innovation Industries · BlackRock · INVESTNL · SAMSUNG CATALYST · imec · xpand · VERVE VENTURES · BITFURY · SiteGround · cdp · Fondo Nazionale Innovazione CDP Venture Capital Sgr · European Innovation Council · sfpi · fpim

## Team *(select examples)*

NVIDIA · Google · QUALCOMM · Movidius · ASUS · intel · IBM · Ambarella · AMD · imec · BAIN & COMPANY · ETH zürich · arm · Lenovo · DELL · hp · blaize · GRAPHCORE · BCG

***High performance AI inference. Simple to deploy. Easy to work with.***

AXELERA ARTIFICIAL INTELLIGENCE

# Opportunity

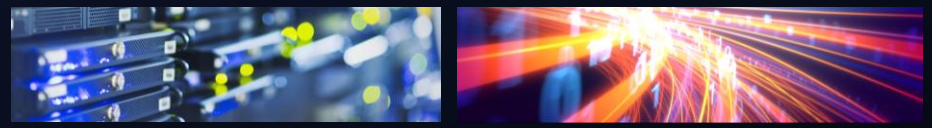

Inference is the future of AI – but existing hardware is holding back adoption

## Inference is the future of AI

*…in edge AI: driving latency, efficiency, privacy and security benefits*

*…and in high performance computing*

## … but existing chips fall short

**Low performance**
Insufficient to handle the latest models

**Power hungry**
Energy inefficient or thermally constrained

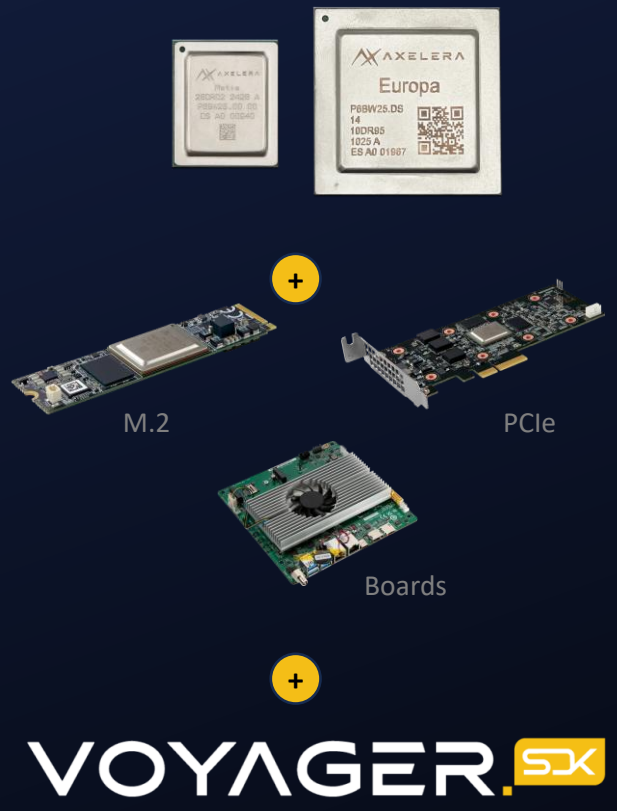

**Expensive**
Customers priced out of mass deployment

The need? **GPU-level performance at a fraction of the price and energy consumption**

# Solution

Axelera AI delivers a fundamental shift in how AI inference runs

## AXELERA AI'S PLATFORM…

## …DELIVERS A PROVEN STEP-CHANGE IN INFERENCE PERFORMANCE

**2-8x better performance**
*vs NPUs (model dependent)*

**4x power efficiency**
*vs GPUs*

**3x cost efficiency**
*vs GPUs*

Proven with **>500 customers** & scale deployments in critical enterprise, security and government environments

AXELERA ARTIFICIAL INTELLIGENCE

# Value proposition

Axelera AI has a unique combination of performance and sovereignty

## Performance & efficiency

**2-8x better performance**
*vs NPUs*

**4x power efficiency**
*vs GPUs at equivalent performance*

**3x cost efficiency**
*vs GPUs at equivalent performance*

*Metis: 219TOPS at 5-9W*
*Europa: 629TOPS at 45W*

## Usability & accessibility – making switching easy

Open SDK

Seamless deployment workflows

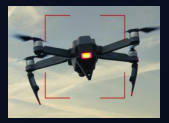

Webstore & community

## Vision AI excellence

Support for most AI workloads; optimized for Vision

The best chips to run Ultralytics Computer Vision models

## Long-term partner with edge to HPC roadmap

**Metis (2024):** For embedded & edge

**Europa (2026):** For edge & server grade

**Titania (2028):** For enterprise and HPC

## Sovereignty – Europe's largest AI chip company

**>$280M** in direct funding from EU sovereign institutions

EuroHPC Joint Undertaking

Delivering critical sovereign infra programs for Europe

Core role in EU semiconductor innovation

AXELERA ARTIFICIAL INTELLIGENCE

# Verticals and use-cases

Axelera AI powers the most advanced AI use-cases today

## Security, surveillance & smart cities

*Perimeter protection*
*Crowd/people behavior monitoring*
*Forensic search and violence/weapon detection*

## Retail & hospitality

*Customer behavior*
*Store automization*
*Smart loss & intrusion detection*

## Defense & aerospace

*Surveillance & situational awareness*
*Image positioning*
*Space (datacentre, missions, LEO)*

## Transportation & logistics

*Traffic monitoring*
*Operator monitoring*
*Autonomy (train, ships etc.)*

## Agritech

*Crop health monitoring*
*Automated harvesting*
*Livestock monitoring*

## Healthcare and life sciences

*Patient monitoring*
*AI-powered diagnostics*
*Surgical assistance*

## Industrials & manufacturing

*Quality control & defect detection*
*Equipment monitoring*
*Warehouse monitoring*

## Robotics

*Pick-and-place*
*World models and advanced robotics*
*Human-machine interaction*

## Automotive

*Infotainment*
*Training simulations*
*ADAS (2028+)*

+ **Enterprise AI**
***(Europa expansion)***

+ **HPC & data centre**
***(Europa & Titania expansion)***

# Silicon roadmap

Spanning edge to HPC

- 5x performance in computer vision
- 6.5-10x performance in Gen AI
- New general processing capabilities

## Metis (2025)

- 214 TOPS at average 5-9W
- Used by 500+ customers today for high-performance edge computer vision
- Run up to 4 models in parallel
- M.2 and PCIe
- Performance of A2000 at the price point of Jetson Nano

## Europa (2026)

- 629 TOPS at 45W
- Built for high-end vision, robotics, HPC and enterprise AI
- PCIe; on-board video decoder; <80B parameter LLMs
- Outperforms NVIDIA L4 or Jetson Thor

- 15x performance in generative AI
- Scale-up and scale-out capabilities

## Titania (2028)

- Ultra-high performance, server-class hardware, delivered through a scalable chiplet architecture
- Unbeatable power and cost efficiency
- EuroHPC R&D funding

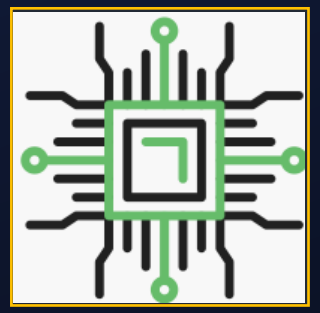

AXELERA ARTIFICIAL INTELLIGENCE

# Voyager SDK

Axelera's toolkit deployment toolkit

VOYAGER SDK

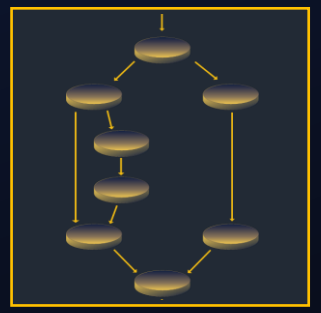

Software to **make switching to Axelera easy** and enable **effortless development and deployment**

**Platform support**

**Runtime stack**

**Compiler**

**Application framework & API**

**Model zoo**

GitHub

*Open and accessible on GitHub*

AXELERA ARTIFICIAL INTELLIGENCE

# Deploying on Axelera's Voyager SDK

We make it easy to port your NVIDIA ecosystem across to Axelera

## Journey 1: *Train* on NVIDIA, *inference* on Axelera

**Train On Nvidia GPU**

PyTorch

TensorFlow

**Export to ONNX**

ONNX

**Convert, quantize and deploy at the edge**

VOYAGER SDK

## Journey 2: *Transition* 'up and running' inference from NVIDIA to Axelera

**Export from Deepstream to ONNX**

NVIDIA DEEPSTREAM

ONNX

**Re-deploy on Axelera**

VOYAGER SDK

# European sovereignty

Axelera AI is Europe's largest AI semiconductor company

## At the heart of Europe's AI and semiconductor innovation

SECO · esa · KU LEUVEN · Chips JU · Raspberry Pi · imec · ETH zürich · EuroHPC Joint Undertaking · ARDUINO · TU/e EINDHOVEN UNIVERSITY OF TECHNOLOGY

## > $280M in EU & sovereign funding to date

European Innovation Council · European Investment Bank · Netherlands Enterprise Agency · INVESTNL · EuroHPC Joint Undertaking · cdp Fondo Nazionale Innovazione CDP Venture Capital Sgr · sfpi fpim

## Key part of critical sovereign infra programs

dare

Designing the chips for Europe's future AI datacentre infrastructure

BOSCH

Developing Europe's autonomous vehicle platform

AXELERA ARTIFICIAL INTELLIGENCE

# Management team

## Leadership

### Fabrizio Del Maffeo, MSc
CEO & Co-Founder

Former AI and IoT industry leader with over 20 years of experience, including key roles as Head of AI at Bitfury and VP & MD of AAEON Europe (ASUS). Founder of UP Bridge the Gap, a €30M AI and IoT platform business. Expertise in building innovative AI and IoT solutions with extensive leadership in high-tech sectors.

### Evangelos Eleftheriou, PhD
CTO & Co-Founder

IBM Fellow and former Head of Cloud & Computing Infrastructure at IBM Research. Previously led Neuromorphic Computing at IBM Research-Zurich. Holds 170 patents, has authored over 350 publications and has accumulated more than 27,000 citations in the field.

### Jonathan Ballon, MBA
Chairman

Former Vice President and General Manager of Edge AI & IoT at Intel IOTG. Previously served as COO and Co-Founder of GE Digital and held the role of Corporate VP at CISCO.

### Inder Singh, MBA
Non-Executive Director

Former CFO at ARM and Unisys, with additional leadership experience as Senior VP at Comcast and VP at Cisco. Currently serves as a Non-Executive Director at IonQ, Wiley, and Affinity Federal Credit Union.

## Management

### Marta Ostroumoff
Chief Financial & Operations Officer

Former CFO at Oxa. Previously served as head of finance at Prodrive as well as other various positions in management and accounting

### Alexis Crowell, MBA
Chief Marketing Officer & GM Americas

Former VP & CTO for Asia Pacific & Japan Region at Intel Corporation. Background in engineering management, finance, operations across 7 countries. Holds an MBA in Finance from the University of Pittsburgh.

### Meghna Singh, MBA
Chief People Officer

Former Senior Manager of People at McKinsey. Previously a Talent Manager at Booking.com and Lead Talent Acquisition at Infosys. Holds an MBA from Symbiosis Institute of Management Studies.

### Manuel Botija
VP of Product Management

Former VP of Product of GML (now SNAP) and Product Manager at Sequans Communications 17 years of experience in semiconductor startups in Europe and Silicon Valley with 2 exits

### Louis Mather
VP of Strategy

Former Associate Partner in Bain's Technology practice and co-founder of xcharta (AI / computer vision platform)

### Eke Bijzitter
Head of Legal

Former Governance and Corporate Officer of Thales Gemalto

### Jonathan Ferguson, MSc
VP of Silicon Engineering

Former Director of Silicon Engineering at Graphcore. Also served as Director of Silicon Engineering at Xmos. Earlier, a Senior Design Engineer at Broadcom

### Ioannis Koltsidas, PhD
VP of Software

Former Tech Lead at Google. Previously served as a staff technical lead at IBM Research. Holds a PhD in Computer Science from the University of Edinburgh.

### Bert Moons, PhD
Director of System Architecture

Former Research Scientist at Qualcomm AI Research. Also served as a Hardware Architect at Synopsys. Holds a PhD in Embedded Deep Learning summa cum laude from KU Leuven.

### Marco Barbato
Director of AI Integrated Systems

Former Director of AI Integrated Systems at Bitfury. Previously held leadership roles at AAEON Europe and Advantech, driving innovation in AI and IoT solutions.

### Pascal Hagel, PhD
Director of Computing Architecture

Former System Architect at Bitfury and Post-Doctoral Fellow at ETH Zurich, with a strong background in system engineering and embedded hardware/software design.

### Philip Hassell
VP of Program Management

Former Software PMO lead at Intel; over 20 years' experience in developing cutting-edge technologies and bringing them to market

### Theodoros Rekatsinas
VP of Machine Learning

Co-Founder of Inductiv (acquired by Apple), Theo was a professor of Computer Science at ETH and Research Scientist at Apple

### Bram Verhoef, PhD
VP of Customer Success

Former Principal Member of Technical Staff at IMEC, with prior research roles at the University of Chicago and a post-doctoral fellowship at Harvard.

### Tricia Dugan, MSe
VP of Americas Sales

Former Global Sales leader at Qualcomm responsible for launching a new category and driving significant sales. Experience across silicon engineering, GTM and sales. MSe from National Technical University.

### Flavio Devide', MBA & MSC
VP of EMEA Sales

Former Sales Director for OEM Global Accounts at Lenovo and CTO for Edge & GTM Strategy at Dell. Holds an MBA from Texas A&M International University and an MSc from Politecnico di Milano.

### Nicolas Silvestre
Director of Sales, APAC

Former Sales Director for the Edge Category at Intel; led strategic sales development for edge and serve platforms across key global strategic customers. Based in Taiwan.

# Working with Axelera AI

Axelera AI has a proven support mechanism to streamline your deployment journey

**Axelera's commitment:** To help our customers deliver value as quickly as possible through a seamless journey from POC to production

## Account Management

Leading you through the process

Flavio Devide
VP of EMEA Sales

Tricia Dugan
VP of Americas Sales

Nico Silvestre
Director of APAC Sales

## Product

Setting the roadmap to deliver more features and functionality to customers

Manuel Botija
VP of Product Mgmt

## Customer success

Helping you fully leverage Axelera technology through **dedicated in-region FAE support**

Bram Verhoef, PhD
VP of Customer Success

## Operations

Ensuring seamless product delivery

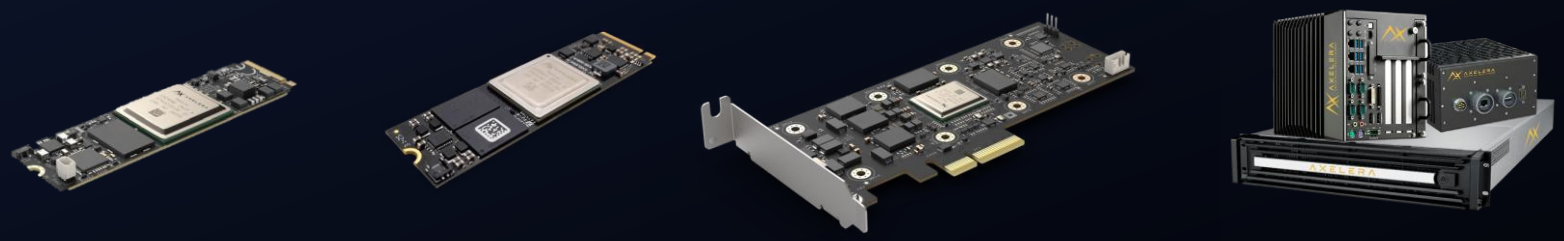

Marta Ostroumoff
Chief Financial & Operations Officer

AXELERA ARTIFICIAL INTELLIGENCE

# Getting started

Start using our platform today

- Explore Axelera specs: Metis & Europa
- Get AI hardware: store.axelera.ai
- Download AI software: github.com/axelera-ai-hub/voyager-sdk
- Engage with our community: community.axelera.ai

AXELERA ARTIFICIAL INTELLIGENCE

# Axelera recognition

## Europe's defining AI chip company

*"We chose Axelera because of their **sovereign technology and long-term availability**, bringing fantastic capabilities to ESA missions"*

esa European Space Agency

*"Stuttgart-based HammerHAI supercomputer will use **AI-optimised inference engines and hardware accelerators from Netherlands-based Axelera AI,** scheduled for the Q2 2026"*

Hewlett Packard Enterprise

HammerHAI

*"Real-world performance and reliability have **exceeded expectations**, enabling breakthrough applications in manufacturing automation and intelligent infrastructure"*

ADVANTECH

*"A very **innovative approach for high performance AI acceleration** by implementing Digital In-Memory Computing…reducing power consumption"*

SAMSUNG

*"We need **real inference performance** at the edge, with the **power constraints** that embedded defense systems impose. Axelera delivers."*

SAFRAN

*"Axelera AI is building **world-class hardware** that powers the most performant & energy efficient inference"*

MULTIVERSE COMPUTING

*"This is the **right technology**, led by the right team, at precisely the right moment in the market"*

SiteGround

*"Advancing **energy-efficient, inference-focused** AI in Europe is essential. Axelera's innovations will permit Telefonica to enable best-in-class AI solutions"*

Telefónica

*"Blackrock backs Dutch chipmaker Axelera AI in **$250M round**"*

Bloomberg BlackRock

*"€61.6M EuroHPC grant to develop Titania chiplet for **sovereign AI**"*

EuroHPC Joint Undertaking

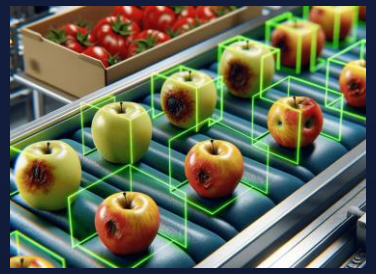

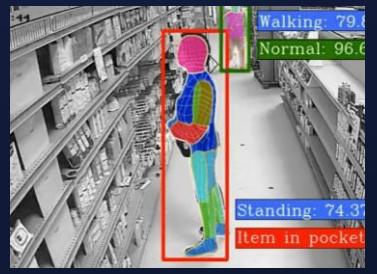

*"Our investment reflects our commitment to fostering European deep tech innovation that addresses **global challenges**."*

European Innovation Council

*"The performance we've achieved running YOLO models on Axelera AI's Metis platform has been **remarkable**"*

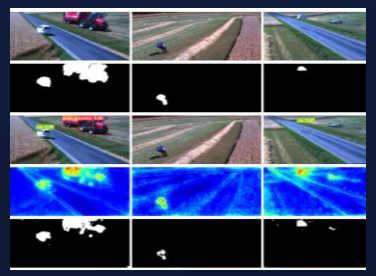

ultralytics
